**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 7-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hickerson (3,150,485).

Hickerson discloses a rocket motore engine used for propelling that utilizes hydrogen peroxide and liquid fuel such as JP-5 (col 3, lines 19-25). The liquid fuel and oxidizer are preheated and injected into the combustion chamber (col. 2, lines 20-70). The device further uses a catalyst bed of silver in the form of a screen (col. 3, lines 25-35).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hickerson (3,150,485) as applied to claims 1-5 and 7-14 above, and further in view of Moore et al (2,791,883).

Hickerson fails to disclose the use of ceramic as a support for the catalyst.

Art Unit: 1755

Moore discloses a catalyst for hydrogen peroxide that includes silver supported on ceramic (col. 2, lines 15-25).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a ceramic support as taught by Moore with the device of Hickerson since Moore teaches that it is a known way to support catalyst for use with hydrogen peroxide and since Hickerson also uses a silver catalyst with a hydrogen peroxide rocket motor.

### ***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aileen B. Felton whose telephone number is 571.272.6875. The examiner can normally be reached on Monday-Friday 6:30-4:00, except alternate Fridays.
